Person.sayHello();

A newb in the coding world, Graphic Designer challenged with Front-End adventure.

The Coders Lab programming boot-camp has confirmed my belief that Front End Development path is full of exciting challenges and possibilities, at the same time I found working with code very satisfactory.

I am looking for a place that will help me grow as a good Front-End Developer, deepen my skills and knowledge and give me a possibility to work on interesting projects in a friendly environment.

Please be invited to contact me! :)

Person.testimonials();

Kamila dealt with the design and preparation for implementation of a number of websites for our clients. Our cooperation was always excellent, to the point - and friendly. We appreciate reliability, timeliness and fast reactions of Kamila to any need for changes. Her experience and commitment guarantee the high quality of the work performed.

Adam Szymczak G&K Komputer

Kamila meets (often not clearly stated) customer expectations and seamlessly introduces the required corrections. Plus, she works quickly and efficiently. This is really a great help in working on the projects.

Michał Sacewicz RESOTECH

With a clear conscience, I recommend... We have been working with Kamila many times so far, when our Global Marketing Department would give up telling us it wasn't possible to meet our deadlines. Yet, Kamila would manage it. Creating for us projects indistinguishable from the "global" ones. Quickly and efficiently. What could we want more?

Adam Doroziński ALCATEL one touch
